

iPads in the Classroom and Video Production

Morning Session

So you don't have enough iPads for 1:1 learning? What now?

This professional learning opportunity will focus on implementing effective pedagogy and practical deployment of 5-10 iPads in the classroom to support whole-class learning and collaboration. This workshop will look at how iPads should be stored and deployed in a UDL and Differentiated Instruction (DI) classroom. The workshop will also look at iPad apps and activities that can be used to support UDL and DI classroom activities.

iOS apps and digital tools that may be highlighted during this session include: Airdrop, Apple TV, Kahoot, Book Creator for Chrome, Google Slides, PowerPoint, Online Drives, Showbie, Padlet and Explain Everything.

Afternoon Session

If you'd like students to start producing videos at a high level in your classroom, then this professional learning opportunity will provide you with the tools to do this. This session is a step by step look on how to film scenes, interviews and how to put it all together in an editing program that you have in your district. Participants will also learn how to manage student files during video production on various devices.

Date: Friday, October 25, 2019
